### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Theresa Orr on 28 March 2004.

The application has been amended as follows:

In claim 1, line 19, "lubrication" has been deleted and - - fluid - - has been inserted before "flow"

In claim 1, line 21, "lubrication" has been deleted and - - fluid - - has been inserted before "flow"

In claim 3, line 1, "3" has been deleted and - - 1 - - has been inserted after "claim"

In claim 4, line 1, "4" has been deleted and - - 3 - - has been inserted after "claim"

### ***Response to Amendment/Arguments***

2. The cancellation of claim 2 in the After Final Amendment filed 20 March 2006 is acknowledged. However, an Examiner's Amendment was necessary to correct the dependency of claims 3 and 4, as pointed out above. Applicant's arguments regarding rejections under 35 U.S.C. § 112 are persuasive, and rendered moot due to Applicant's amendment of the claims.

***Information Disclosure Statement***

3. The information disclosure statement filed 30 January 2006 fails to comply with 37 CFR 1.97(c) because it lacks the fee set forth in 37 CFR 1.17(p). It has been placed in the application file, but the information referred to therein has not been considered.

***Allowable Subject Matter***

4. Claims 1 and ~~3~~-29 allowed over the Prior Art of record.

5. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of independent claims 1, 10, 14 and 21 is the inclusion of the specific limitations of a "dead-end cavity" formed in a second flow gap where the fluid/lubricant is either "de-aerated" or becomes "non-aerated" in an aeration sensing device/system. As to independent claims 24 and 27, the inclusion of the limitation of a "radially outwardly extending terminal lug" and "a slot formed on a second wall to receive the terminal lug" in an aeration sensing device. As to independent claims 25 and 28, the inclusion of the specific limitation of a "non-conductive sensor body" and "a central aperture" in an aeration sensing device. None of the Prior Art have these specific limitation in combination with the other recited elements in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2856
